SUMMARY

I'm currently enrolled at MATC studying Web and Software Development.

Web development is an exciting and fulfilling experience. After 10 years of working as a chef in the restaurant industry I have acquired swift critical thinking skills and team mentality required to be successful in the ever growing technology field . The surplus of knowledge to gain , problem solving scenarios, and the creative aspects of software and web development are just a few examples of the things I love about this industry.

WEB DEVELOPMENT COURSES

Sept. 2019	**Udemy - The Complete Javascript Course 2020 - Jonas Schmedtman** Studied Asynchronous JavaScript, DOM manipulation, and ES6 basic fundamentals. Also, gained basic knowledge of NPM, Babel, nodeJS, and Webpack.
Jan. 2018	**FreeCodeCamp** Studied Basic JavaScript ES5 fundamentals. Studied HTML 5 and CSS. Learned how to make websites responsive for mobile devices using media queries. Built static web forms. Created a base portfolio using CSS flexbox.
